California Rare Fruit Growers, Inc. is a 501(c)(3) nonprofit organization. It was founded in November 1968 by John M. Riley and Paul H. Thomson.

# SEPTEMBER & OCTOBER 2018 🔊 VOL. 50, NO. 5

# **Features**

### **Jujubes: Li and Sherwood**

In 1999 Don Winterstein, with prodding from his Chinese spouse, purchased a Li jujube. Over time and with grafting he added a Sherwood. He has not been disappointed at all in these trees, but over the years since then has learned a lot about what they like and how they behave. Today he considers them among his favored fruit trees, but recognizes that the qualities that he likes in their fruits aren't necessarily the reasons that others like them. Don says that jujubes are great trees to have in a garden and, except for having to deal with the root suckers and tolerating bird damage, are very robust and pretty much trouble-free.

## Hovenia dulcis, the Raisin Tree

Bev Alfeld has recounted many expeditions that she and her son Tim have taken to various Asian venues. She always returns with interesting things to tell about local fruits and cultures. This story is an unique interweaving of fruit history with that of a Chinese national treasure.

## **Durian, Part 2: Myths and Health Issues**

The nutritional values and the possible hazards of various foods are almost always guaranteed to be controversial. Alice Ramirez proves this in Part 2 of her series on durians. She examines topics from possible hazards of imbibing alcohol with durian, to the medicinal values and uses of durian and everything in between, including durians' effect on libido.
